DIVISION OF
OIL, GAS & MINING

DATE OF INQUIRY	INQUIRING PARTY	NATURE OF CALL/INQUIRY	HOW CALL WAS HANDLED
11/22/93	Loyd Swan	ASKED IF STATE KNEW ABOUT OIL SHALE EXTRACTION PROCESS @ 690 S VERNAL AVE	REFERRED TO RJ FIRTH AFTER VISIT.
<p>Ted Allen has set up an oil shale extraction process to separate oil from shale at 690 South Vernal Avenue, Vernal, Utah. Dave Hackford and I visited the site at 2:00 P.M. on 11/22/93. We were told a test run will occur in the next few days. There was 190 tons of shale at site which was brought in from private land - he didn't say where. Does he have a permit or need one? Operator didn't offer any additional information and was 'tight lipped' about the situation.</p>
